## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

			APZN Rec'd PATATA NO FER YILIK	
	Вох	c No		
1.	Witl the	h reg lang	gard to the language, this opinion has been established on the basis of the international application in guage in which it was filed, unless otherwise indicated under this item.	
		lan	is opinion has been established on the basis of a translation from the original language into the following guage , which is the language of a translation furnished for the purposes of international search ider Rules 12.3 and 23.1(b)).	
2.			gard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application and ary to the claimed invention, this opinion has been established on the basis of:	
	a. ty	/pe	of material:	
	I		a sequence listing	
	[		table(s) related to the sequence listing	
	b. format of material:			
	0		in written format	
			in computer readable form	
	c. ti	me	of filing/furnishing:	
	[		contained in the international application as filed.	
	£		filed together with the international application in computer readable form.	
			furnished subsequently to this Authority for the purposes of search.	
3.		has	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto s been filed or furnished, the required statements that the information in the subsequent or additional pies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.	
4.	. Additional comments:

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/JP2005/010751

14P20 ROO'0 PCT/F10 09 FEB 2006

## Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: US2004/0062525

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

The document D1 discloses an imaging apparatus for recording captured images (paragraph [0005]), comprising a plurality of connector units for connecting removable storage medium (implicit), respectively;

a first storage medium ([paragraph [0012]) that is connected to a first connector unit among the plurality of connector units (implicit) and stores a plurality of image data as an object of image retrieval (paragraph (paragraphs [0044], [0069]);

a second storage medium that is connected to a second connector unit among the plurality of connector units and stores key image data as a retrieve condition that was generated independently from the image data (paragraphs, [0009], [0057]);

a retrieval unit that retrieves image data from the first storage medium that is similar to the key image data read from the second storage medium (paragraph [0072]).

The above objection also applies to claims 2, 12 and 13, which contain features belonging to claim 1 as well.

The above objection also applies to claims 10 and 11, which concern the method and program corresponding to claim 1.

Dependent claims 3, 5, 6, 7, 8, 9 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and inventive step, see document D1 and the corresponding passages cited in the search report.

The available prior art does not appear to prejudice the novelty and inventive nature of the remaining claims.
